DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

ZAP-IT CONCENTRATE is a non-selective herbicide that can be used to control weeds, grasses or other undesirable vegetation along fences, sidewalks and driveways, around trees, shrubs and ornamental plantings, around buildings, in brick and gravel walkways and for spot treatment in lawns.

IMPORTANT

For spot treating in lawns and around trees and shrubs, a tank-type sprayer is recommended. Spray carefully. Avoid spray or drift contact with desirable lawn grasses, shrubs or trees. ZAP-IT CONCENTRATE is not selective and can kill all vegetation contacted. If accidental drift contacts desirable foliage, wash off **immediately** with water. Do not apply when rainfall is expected within 24 hours of application as weed control will be reduced.

WHEN TO APPLY

Apply at any time that vegetation is actively growing. Warm, sunny weather will accelerate systemic movement from leaves and stems down to the roots, to

give complete kill. Heavy lawn grass or difficult to control perennial weeds, such as Bermudagrass, nimblewill, dandelion or Canada thistle may require a repeat application, if regrowth occurs. For best results, apply on a sunny day when the daytime temperature is at least 60°F. **Apply only when the air is calm. Do not use on or around edible feed or food crops.**

HOW TO APPLY

GENERAL WEED AND GRASS CONTROL: To apply with a plastic, aluminum or stainless steel tank-type sprayer, mix 8 fluid ounces (1 cup) of product per 1 gallon of water and spray to wet undesirable vegetation. **NOTE:** We do not recommend a galvanized or unlined steel sprayer. Never store unused spray. Rinse used sprayer.

WHERE TO APPLY

General Weed Control: Apply ZAP-IT CONCENTRATE to control undesirable plants growing in fences, around physical ornaments, buildings, tool sheds or other areas where control is desired.

Landscaping: Apply ZAP-IT CONCENTRATE to control undesirable weeds or grasses growing in areas where planting of ornamentals, trees, shrubs, desert landscapes, rock gardens, flower beds or similar plantings will be made.

Ornamentals: Apply ZAP-IT CONCENTRATE to control undesirable plants growing around ornamentals, trees or shrubs. Spray contact other than with mature bark of desirable plants may cause injury.

Lawns: Apply ZAP-IT CONCENTRATE to control undesirable weeds growing in lawns. Spot treating undesirable weeds in a lawn will cause a dead spot until sufficient growth occurs to close the areas. Larger spots will require reseeding to provide complete grass cover and help protect reinfestation by undesirable plants.

<u>Amount of Concentrate</u>	<u>DILUTION TABLE</u>	
	<u>Amount of Water</u>	<u>Area to be Treated</u>
8 fl. oz. (1 cup)	1 Gallon	250 sq. ft.
16 fl. oz. (1 pint)	2-3 Gallons	500 sq. ft.
32 fl.oz. (1 quart)	4-6 Gallons	1,000 sq. ft.

Visible effects generally occur within one week with complete kill in 2 to 4 weeks. Reseeding of treated lawn areas may be done 7 days after treatment.
