

Mobile Foam Cart Part No. CMFC-1

DESCRIPTION

The Chemguard Designated Mobile Foam Cart holds 36 gallons of fire fighting foam concentrate SB95P, In-line 95 GPM Eductor, handline nozzle and 50' of 1½" rubber lined single jacket fire hose. The ease of handling and mobility of the foam cart makes this a very effective fire fighting unit for all types of class A & B fires. To place the unit in operation, connect to a 1½" fire hose from a suitable water supply. The tank is manufactured of reinforced fiberglass which makes the unit suitable for use with all types of foam concentrates and environments.

FEATURES

- Nozzle features ball shut-off for better stream control and is designed to give a constant flow whether on straight stream or fog patterns
- 3" x 16" semi-pneumatic tires for ease of handling on rough terrain
- Fire hose has lightweight 1½" NST couplings
- Pick up tube on in-line eductor is manufactured of stainless steel

OPTIONS

- Additional 50 foot length of fire hose for connecting to water supply
- Other nozzle selections

CAUTION

If using any of the AR-AFFF type foam concentrates in the unit, it is recommended that a thin layer of mineral oil be placed on the surface of the foam concentrate to minimize evaporation.
